LOOKING BACK AND LOOKING AHEAD:

The ASEM Education Process – History and Vision

2008 - 2018

Launched in 1996 with the first political Summit of Heads of State or Government held in Bangkok, the ASEM process was established as an interregional forum that has now evolved to encompass 51 member countries in Asia and Europe, the ASEAN Secretariat and the European Commission. Education has become a key area of ASEM since 2008, in particular. This year's tenth anniversary therefore provides an excellent opportunity to reflect upon the past, the present and the future of the ASEM Education Process (AEP).

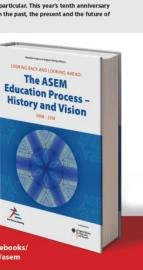

This publication creates, for the first time, a multifaceted portrait of AEP – just like a kaleidoscope: The Education Process is highlighted from different perspectives by the editors and various authors from ASEM members and stakeholders.

The first part of the publication elaborates the context, history and development of the ASEM Education Process and presents its achievements and challenges. In the second part, key areas where action is needed for future direction of AEP are identified and a number of activities for further development of AEP are proposed in order to meet future global challenges to the benefit of the people in Asia and Europe.

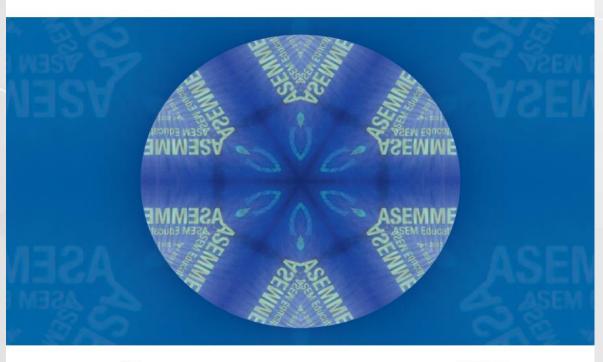

LOOKING BACK AND LOOKING AHEAD:

The ASEM Education Process – History and Vision

2008 - 2018

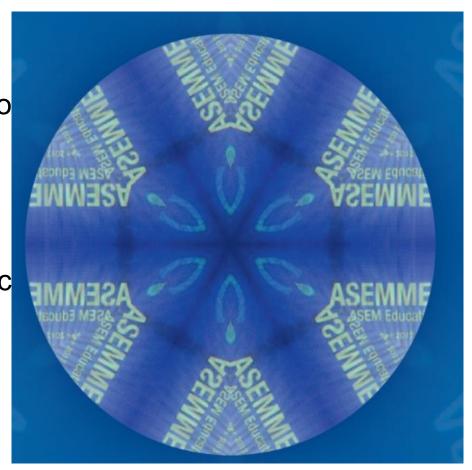

SPONSORED BY THE

ASEM Education Process History and Vision

Rationale/Background

- analyse ASEM as a multilateral, transregional forum fo dialogue from different perspectives = kaleidoscope
- 10 year anniversary right moment to take stock and look ahead
- first comprehensive multifaceted portrait of AEP based on analyses of key policy documents, academic literature, working documents, written questionnaires, interviews + contributions/inputs across ASEM community +
- identification of different potential scenarios/options

ASEM Education Process – History and Vision

ASEM Education Process (AEP) - the road ahead

Alexandra Angress/Siegbert Wuttig

239

ASEM Education Process – The Road ahead

Option 1: Ending AEP

After ten years of existence, AEP terminates due to marginal gains or a lack of interest or because AEP has completed its mission.

Option 2: Continuing AEP in its status quo with moderate modifications

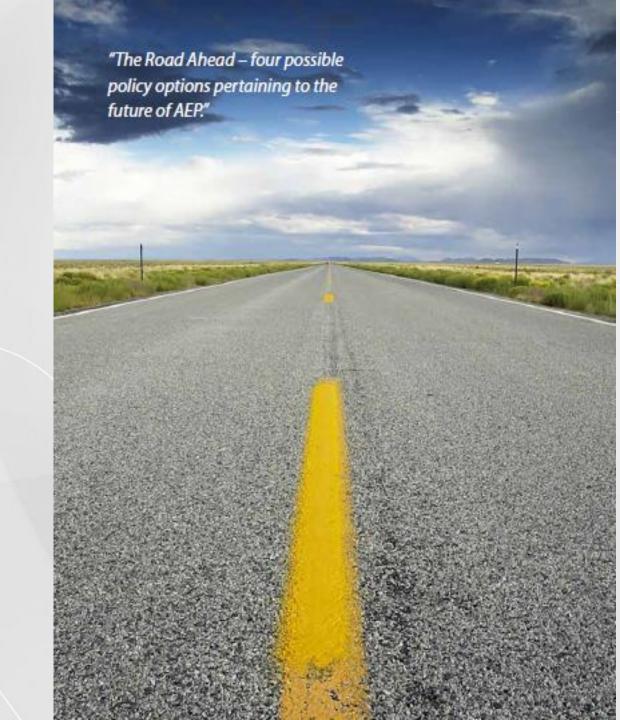

AEP continues in its current form with some improvements, for example, in the format of meetings, the reporting and the visibility of the Education Process.

Option 3: Making AEP fit for the future by introducing a wide range of modifications

In order to further enhance dialogue and cooperation between Asia and Europe, to make AEP more effective and output-oriented, and to adapt AEP to future needs (cf. political objectives/fields of action in Table 1), AEP continues in its current form but with a wide range of modifications and new elements, including enhanced political management of AEP.

Option 4: Turning AEP into a clear top-down strategic governance process

AEP continues with substantial changes regarding strategic governance and coordination of AEP, as well as enhancing the effectiveness of dialogue and cooperation, and developing clear top-down processes.

ASEM Education Process – The Road ahead: 4 options

Option 1: Ending AEP: EP terminates due to a lack of success and marginal gains - or because AEP has completed its mission.

Option 2: Continuing AEP with moderate modifications: AEP continues in its current form with some improvements, for example, in the format of meetings, the reporting and the visibility of the Education Process.

Option 3: Making AEP fit for the future by introducing a wide range of modifications: to make AEP more effective and output-oriented and adapt to future needs, AEP continues in its current form but with a wide range of modifications and new elements, including enhanced political management of AEP.

Option 4: Turning AEP into a clear top-down strategic governance process
AEP continues with substantial changes regarding strategic governance and coordination

ASEM Education Process – The Road ahead: Option 3

Option 3 - AEP with a wide range of modificactions

This option identifies a number of political objectives/fields of action & potential activities & actors to further develop AEP to make it fit for the future.

- The political objectives/ fields of action outlined primarily reflect the results of the document analysis and feedback from ASEM members and stakeholders.
- The potential activities have been proposed by ASEM members and stakeholders complemented by the editors.
- The actors listed are the ones responsible for endorsing or implementing the proposed activities.

Table 1: Option 3 – Elements for a Modified ASEM Education Process

Political Objectives /

ASEM Education Process – The Road ahead: Option 3 - Objectives

Political Objectives /Fields of Actions

- Bringing AEP closer to the overarching ASEM process
- Developing people-to-people connectivity as guiding principle of AEP boosting academic and non-academic short-term and long-term mobility
- Expanding AEP's current thematic priorities/scope to meet new challenges
- Strengthening, widening and deepening dialogue and cooperation
- Improving effectiveness of AEP
- Making AEP and its success stories more visible

ASEM Education Process – The Road ahead: Option 3 - Activities

Developing
people-to-people
connectivity as
guiding principle
of AEP by boosting
academic and nonacademic short-term
and long-term
mobility

Use and extend existing exchange and cooperation programmes: e.g.

(5) motivate more countries and individuals to take part in bilateral and multilateral mobility programmes such as ASEM-DUO; ASEM Work Placement Programme; AEI and ASEF activities; international mobility of Erasmus+5 ASEMME (policy); education institutions (development/implementation); EU/Ministries (funding)

 (6) inform education institutions in ASEM countries about opportunities for mobility EU; National Agencies; AES; ASEF, AEI, ASEM-DUO (information)

(7) expand existing regional programmes to Asia-Europe schemes (e.g. combine ASEAN International Mobility for Students programme AIMS with Erasmus+ mobility) Ministries/EU (policy; funding); education institutions (implementation)

ASEM Education Process – The Road ahead: option 3 - Activities

Strengthening, widening and deepening dialogue and cooperation (10) Intensify dialogue and cooperation with international forums (e.g. Bologna Policy Forum⁶, APAIE, EAIE, NAFSA) Ministers (policy); AES (participation in policy events; presentation of AEP initiatives in information booth)

(11) widen and deepen dialogue and cooperation between Asian and European Quality Assurance Agencies and Recognition Centres (e.g. develop a common ASEM framework for academic recognition based on lessons learned in the SHARE initiative and the Bridging Recognition Declaration) SHARE, AQAN, ENQA, etc. NARICS, CBQAN

(12) improve communication and networking among ASEM members and stakeholders between Ministerial Meetings by providing a closed ASEM information online forum AES (implementation)

(13) motivate and convince more ASEM members to participate in agreed multilateral ASEM initiatives (e.g. ASEM Joint Curriculum Project)

Ministers (policy); Senior Officials (implementation); AES (coordination)

ASEM Education Process – The Road ahead: Option 3 - Activities

Improving
effectiveness of
AEP – towards
more action and
interaction

(24) Develop a vision 2025 with clearly defined objectives/targets regarding policy and result-oriented pillar (e.g. further elaborate the Seoul Declaration and define some measurable targets such as "By 2025, we will have implemented 10 new multilateral ASEM mobility projects and have increased the number of participating individuals in ASEM-DUO/AEI/ASEM WPP by 25%")

Senior Officials (preparation); Ministers (policy/adoption)

(25) prepare and adopt a strategic AEP action plan

Senior Officials/AES (preparation); Ministers (adoption)

AEP - Looking ahead

The approach suggested seeks to combine **bottom-up activities** with **top-down governance** elements.

It is argued that it has the potential to advance AEP and enhance its capacity in order to help solve global challenges and demonstrate clear added value of ASEM Education cooperation

The Vision for AEP with educational objectives that is translated into corresponding policies is centred around the following elements:

- strengthened investment in people-to-people contacts/mobility
- enhanced widened and deepened dialogue
- cooperation based on a number of sucessful and new initiatives
- improved working methods based on an agreed road map/strategic action plan

AEP - Looking ahead
